## CAREER OBJECTIVE

---

Computer Science Engineering student with strong problem-solving and system design skills, focused on building scalable and high-performance applications. Seeking software engineering opportunities to develop impactful and efficient solutions.

## EDUCATION

---

|                                                                                     |             |
|-------------------------------------------------------------------------------------|-------------|
| <b>Bachelor of Engineering in Computer Science</b> , Chandigarh University, Gharuan | 2023 - 2027 |
| <b>Senior Secondary</b> , S.U.S.G.S.S.S School, Sunam                               | 2021 - 2022 |
| <b>Secondary</b> , D.A.V Public School, Sunam                                       | 2019 - 2020 |

## EXPERIENCE

---

|                                                                                                                                                                                                                                                                                                                                                                                      |                      |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------|
| <b>Data Analyst Trainee</b>                                                                                                                                                                                                                                                                                                                                                          | May 2025 - June 2025 |
| ThinkNext Technologies Private Limited                                                                                                                                                                                                                                                                                                                                               | Mohali, Punjab       |
| <ul style="list-style-type: none"><li>Built a secure sales analytics dashboard, reducing manual analysis effort by 30% and enabling real-time insights.</li><li>Analyzed and processed sales data using Pandas and NumPy to generate key insights and trends.</li><li>Integrated role-based authentication and enhanced data workflows for secure and efficient analytics.</li></ul> |                      |

## PROJECTS

---

|                                                                                                                                                                                                                                                                                                                                                             |                       |

## SKILLS

---

|                                 |                                                |
|---------------------------------|------------------------------------------------|
| <b>Languages</b>                | C, C++, Java, SQL, JavaScript                  |
| <b>Frameworks and Libraries</b> | React.js, Next.js, Tailwind CSS, Pandas, NumPy |
| <b>Tools and Platforms</b>      | GitHub, Vercel, Supabase(PostgreSQL), Firebase |
| <b>Core Concepts</b>            | DSA, DBMS, OOPs, System Design, REST APIs      |
| <b>Soft Skills</b>              | Teamwork, Leadership, Quick Learner            |

## ACHIEVEMENTS

---

- AI HackMatrix Runner-up**- Secured 2nd place among 250+ teams in a national-level hackathon.
- Research Paper**- Authored a research paper on "Fake Image Detection using Machine Learning", focusing on developing models to identify manipulated or deepfake images with high accuracy.

## CERTIFICATIONS

---

- Negotiation Skills - University of Michigan.
- Programming for Everybody - University of Michigan.
